## Experience

### Store All the Bits

Overland Park, KS

### Full Stack Software Developer

Mar 2022 – Feb 2024

Responsible for executing the full Software Development Life Cycle for the Print Job Tracking (PJT) web application. The application enables the tracking of order fulfillment for multi-part products composed of components that vary in color and quantity. Functionality enables the user to update print jobs as they are completed and see material and time requirements for upcoming print jobs, as well as add new products / components and new orders.

- Leveraged the Agile approach using iterative builds to ensure application met user requirements.
- Participated in daily scrum meetings with the user in order to obtain feedback on designs and provide updates on progress.
- Used wireframes, screen mock-ups, and requirements documents to design and implement the application.
- Implemented with a Django front-end driven by a relational database (PostgreSQL).
- Deployed via Docker in order to provide ease of testing, deployment, transportability, and future scaling, if needed.
- Application source code controlled through Github.

## Skills

**Languages:** Python, C++, JavaScript, C#, Java

**Databases:** PostgreSQL, Oracle, SQL, Object-Relational Mapping

**Tools:** Docker, Git, GitHub, Power BI, Hadoop, Hive, PowerShell

**Web Development:** Django REST Framework, ASP.NET, Flask, HTML, CSS

**Data Analytics:** Data Analysis, Data Visualization, Tableau, R, Excel

**Cloud:** AWS, Azure, Linux

**Software Engineering:** Object Oriented Programming, SDLC, Agile Development

## Projects

### Spotify Discovery Extract

Python Project that uses simple API calls to Spotify's API to the Weekly generated Spotify Discovery playlist and saving the playlist to the user's profile for later use.

### Portfolio Website

Crafted a bespoke Portfolio website highlighting a diverse range of projects utilizing HTML, CSS, and JavaScript, as well as many other skills. To learn more about these projects and website, visit: <https://tprice.dev>

## Education

### Associates of Applied Science

Computer Information Systems

Johnson County Community College

3.5+ GPA

### Data Analytics Certificate

Johnson County Community College

3.4+ GPA

## Certifications

AWS Cloud Practitioner

Nov 2023
